[About](#)

Fun and Function is one of my go-to online stores for anything & everything Special Needs! I was recommended to them years ago & quickly fell in love, I have purchased many items from them for my son, I even won a Facebook giveaway last year & I'm happy to feature them again here at IHeart-Motherhood!

Aviva Weiss & her husband, Haskel launched Fun and Function in 2005, Aviva was a pediatric occupational therapist & had a child who had sensory processing disorder. Today, parents, teachers & therapists value the innovative products that Fun and Function has to offer to children on the Autism spectrum, have sensory processing disorders, speech/developmental delays as well as other challenges.

From weighted vests to swings, chewies, lap pads & more, whatever you are shopping for, Fun and Function has the products & toys that are perfect for the child in your life with Special Needs!

I was sent a variety of Squoosh Pets Fidget Toy from Fun and Function for My Big Guy, these fun, adorable & squeezable pets are fun to share & collect! The Squoosh Pets are the perfect size for little hands, great for hand writing warm up, they are fine motor friendly & can even be attached to your child's backpack!

My Big Guy loved the Squoosh Pets Fidget Toy, I didn't even have to tell him what to do with them. He picked one up, squeezed it & to my son's surprise, the little guys eyes popped out, he started laughing so hard!

All of the Squoosh Pets are great for squeezing, please don't put it in your mouth & they are recommended for ages 8 & up.

The Squoosh Pets Fidget Toy can be purchased online at Fun and Function in a variety of assorted packs. You can also stay connected with Fun and Function by liking them on Facebook & tweeting with them on Twitter!

with love, *Jessica*
